

POKÉMON

TM

DATA VIZ VERSION

Data Visualization Final Project
S. Calabretta, M. Liotta

ANALYSIS MAIN TOPIC

Answering POKÉMON related questions, to investigate Types and Specs across all generations.

DATA SOURCES

- * All-gen POKÉMON statistics and informations: --> <https://www.kaggle.com/datasets/darkmatternet/ultimate-pokmon-dataset-2025>
- * Preferred POKÉMON (2020) --> <https://pokemon2020.pokemon.com/en-us/>

FAN FAVORITES POKÉMON DON'T RELY SOLELY ON THEIR (Extreme) POWER

Top 10 most liked Pokémon up to Gen 8 span across middle-to-high base-stat distribution

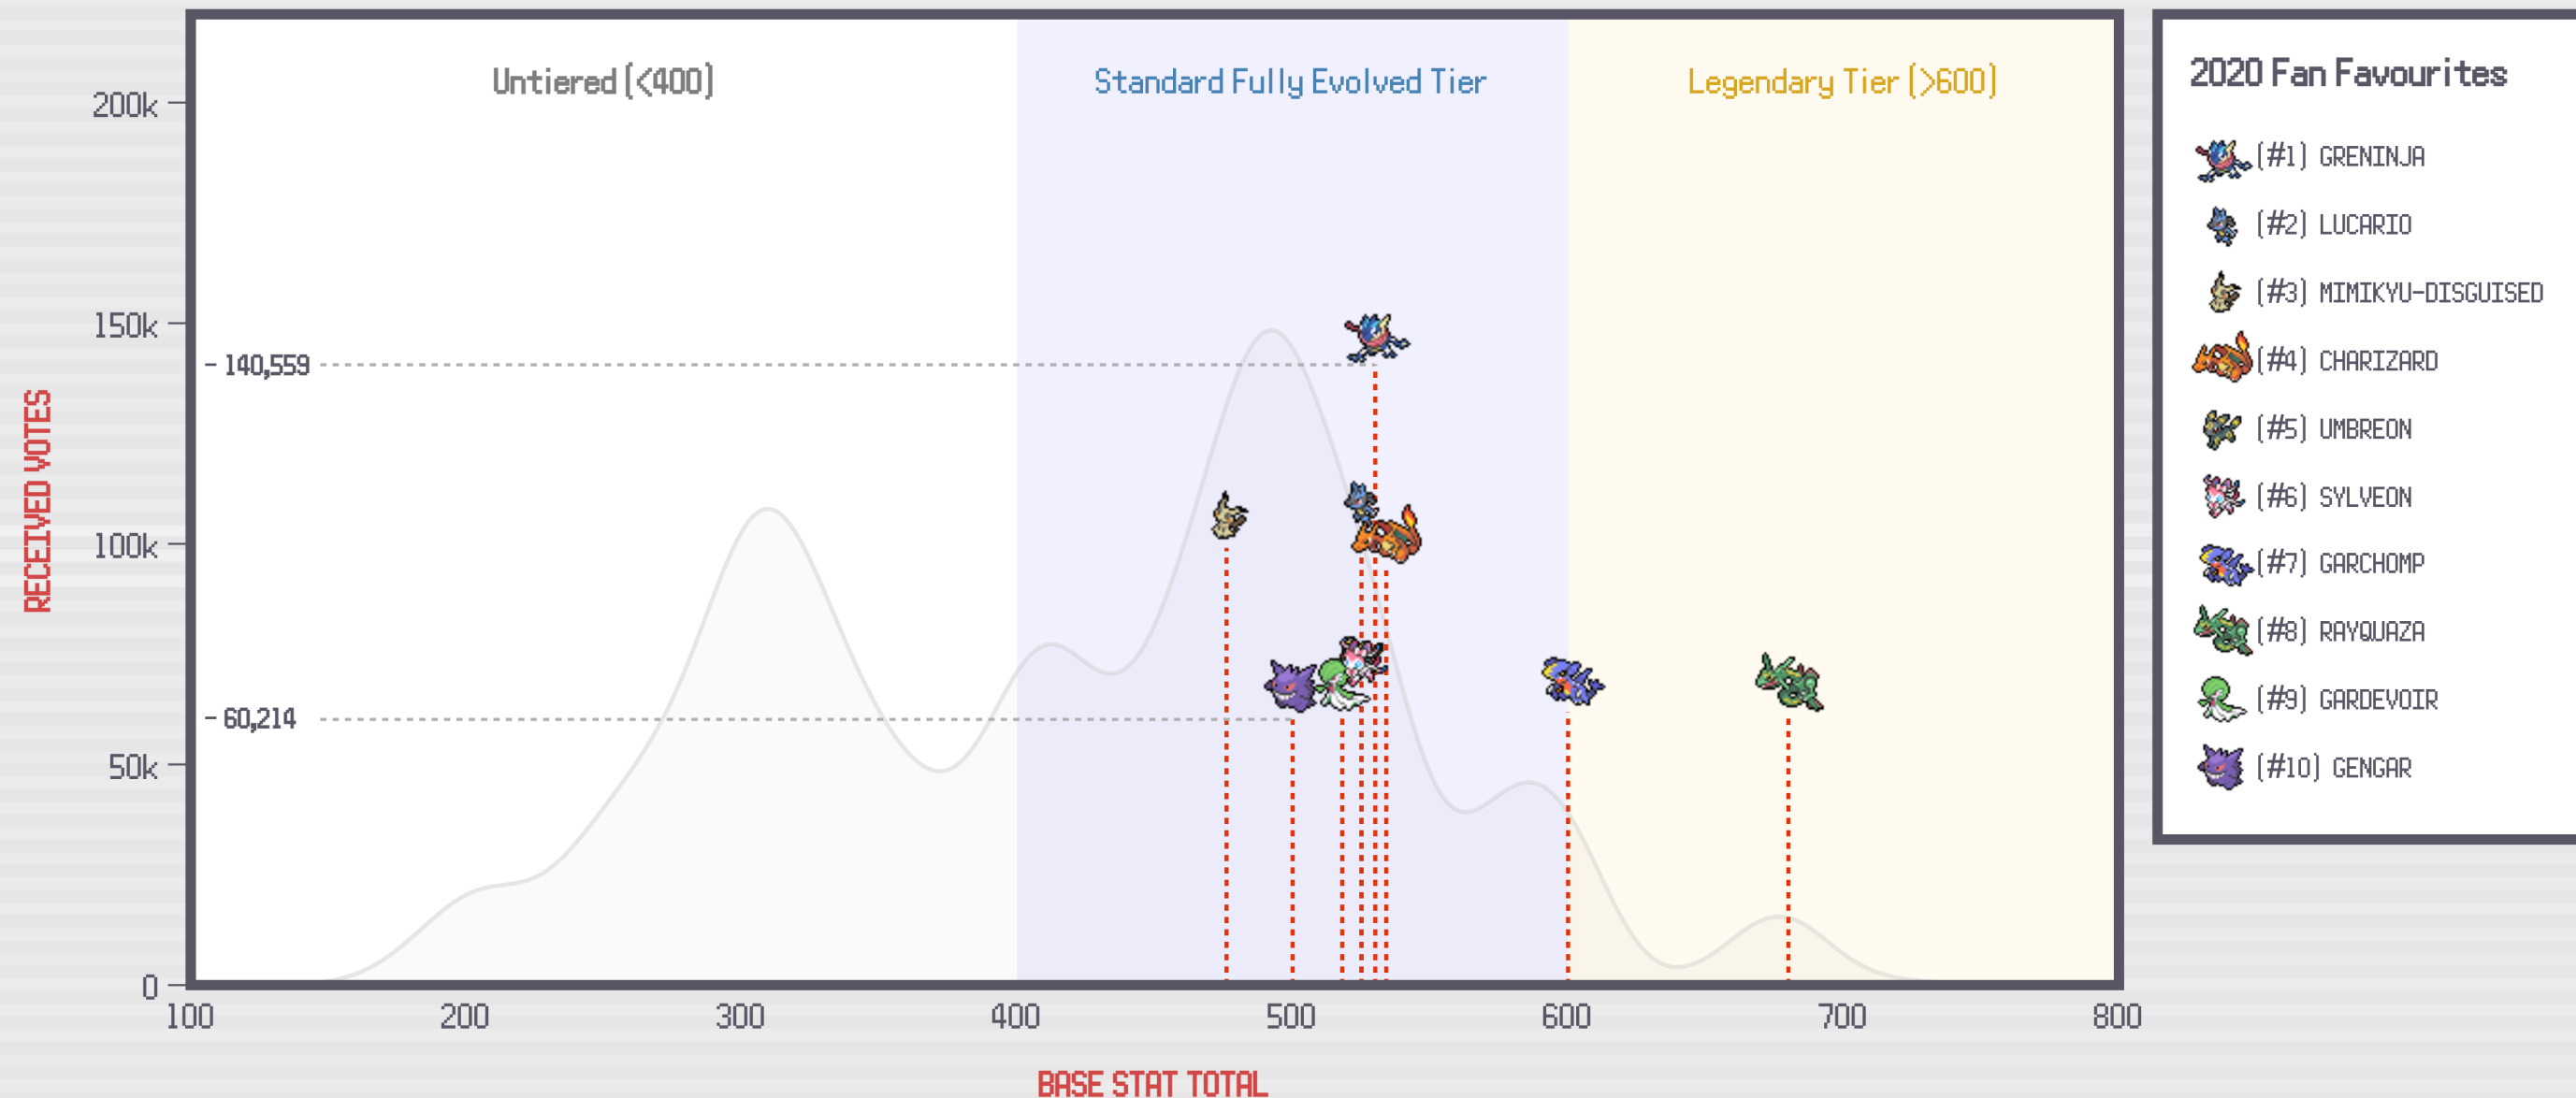

FIGURE. Base Stats of all 905 POKÉMONs up to gen 8. Performed density estimation via KDE, where overlaid POKÉMON sprites resemble in heights the 2020 POKÉMON of the year user preferences. Here showed the 10 highest preferences. Source - <https://pokemon2020.pokemon.com/en-us/>

POKÉMON TYPES STAY TRUE TO THEIR NATURE

Comparing the median total stats (Attack + Defense) across all types

FIGURE. Comparison of median total stats (att+def) across all 18 POKÉMON types up to Gen IX, with dashed line representing a balanced 1:1 stats ratio. Highlighted regions show the most heavily skewed types. [kaggle.com/datasets/darkmatternet/ultimate-pokemon-dataset-2025]

Data attributes and visual channels

Data Attribute	Attribute Type	Visual Channel
Median POKÉMON Physical stats per type (att + def)	Quantitative	Using X-axis
Median POKÉMON Special stats per type (att + def)	Quantitative	Using Y-axis
POKÉMON Type	Categorical	Color HUE +symbols
Type combat profile	Categorical	Containment and color HUE

AN ALMOST THIRTY YEARS LONG PARAMETER TUNING

Evolution of core base statistics alongside specific generation snapshots

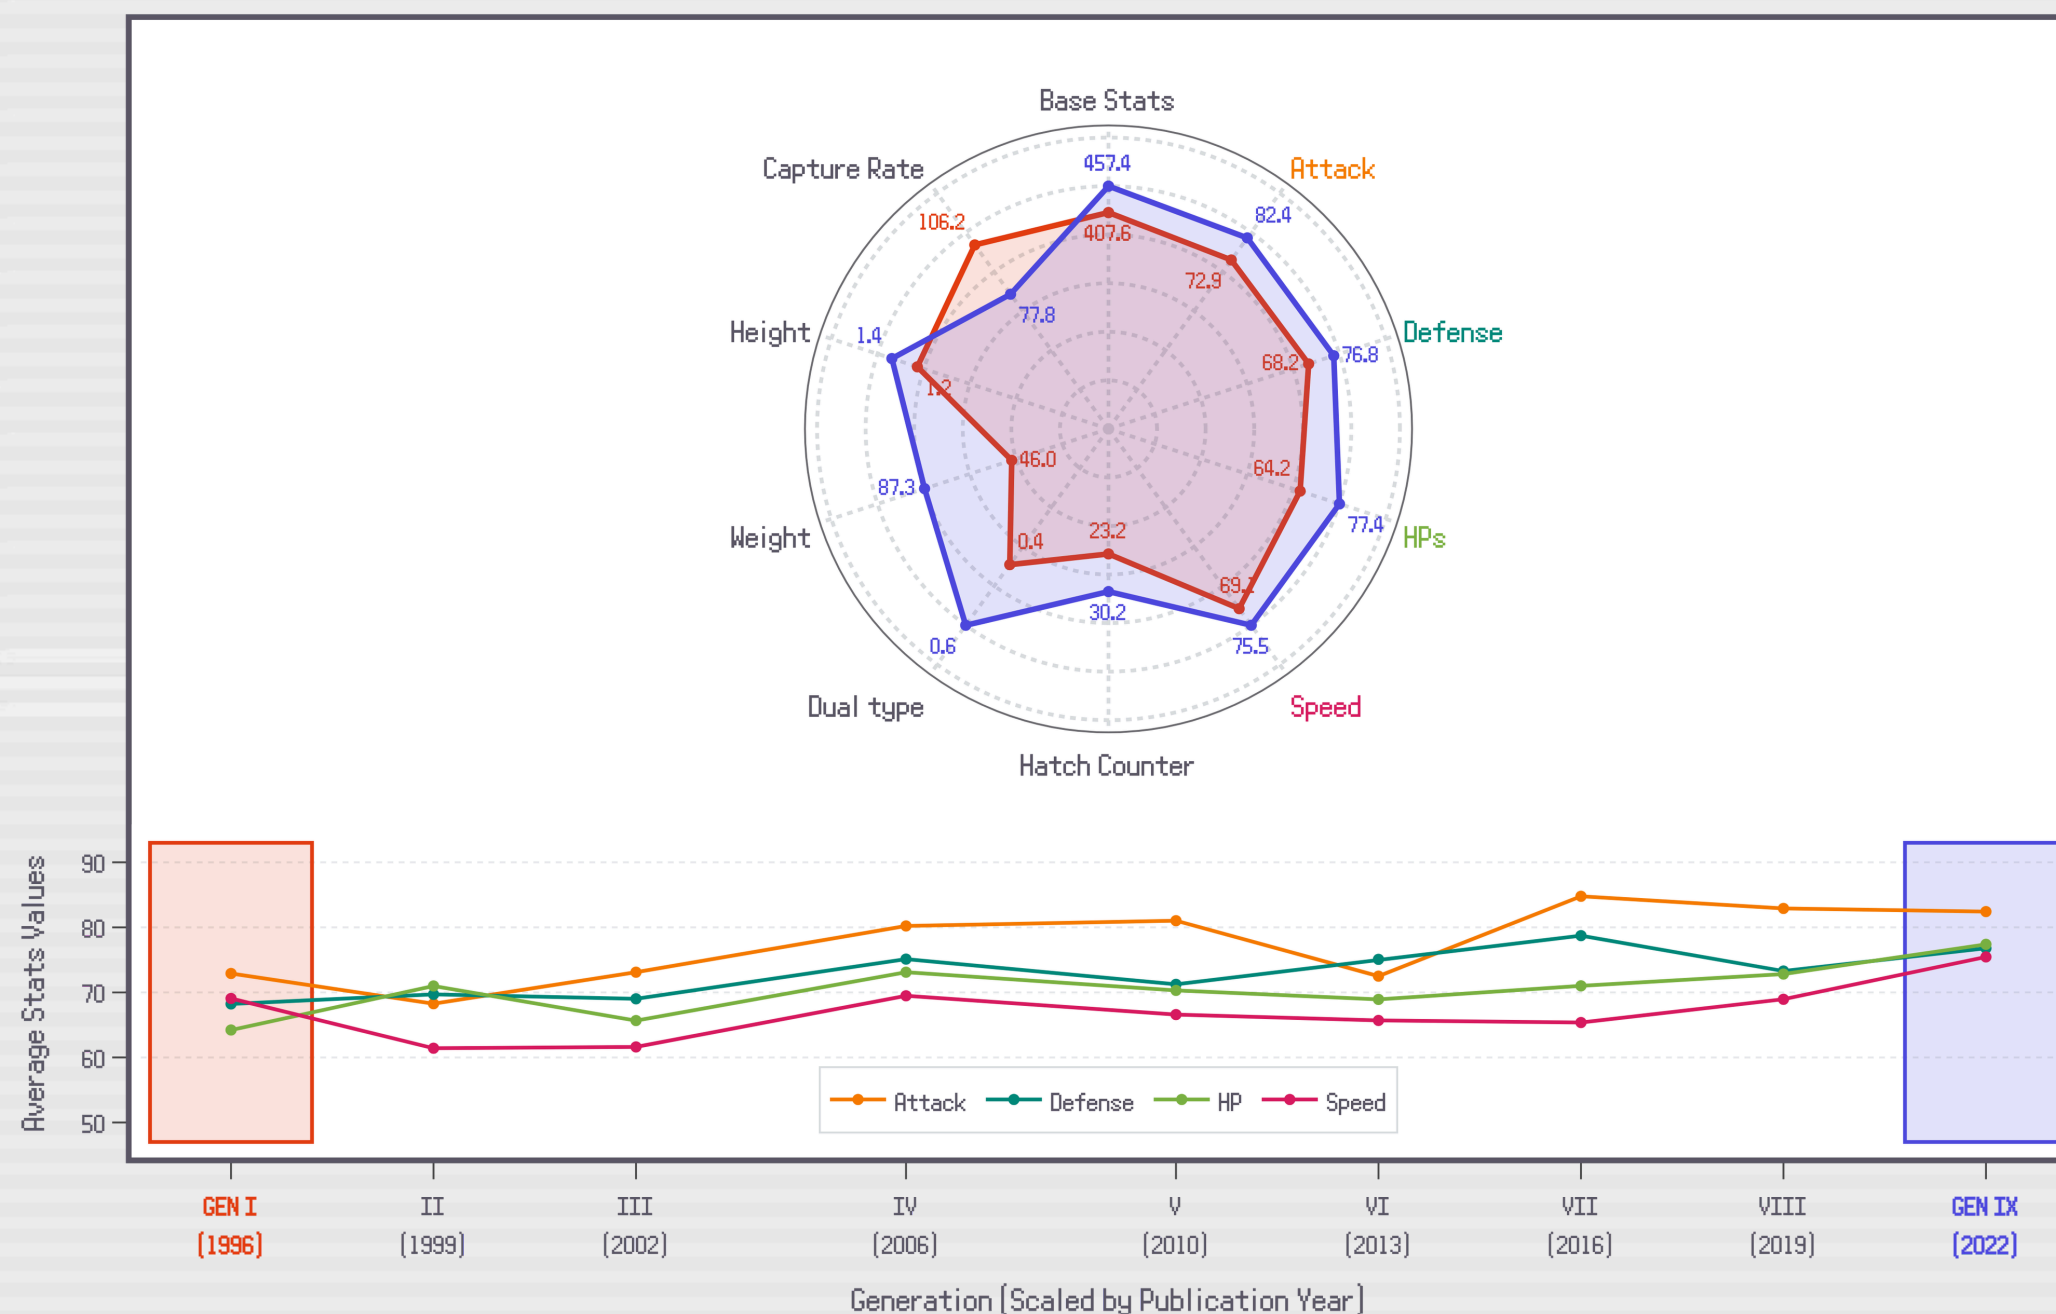

FIGURE. Line chart tracks the true average of HP, Attack, Defense, and Speed across all 9 generations. Above the chart, comprehensive radar profiles compare Gen I and IX averaged statistics. The highlighted boxes emphasize the specific generations showcased in the radar charts.
